

La Roche Chabrelle Internet Access Policy

We run our Wi-Fi network without the need for a key. So you just connect to your nearest wireless access point.

Please make sure that you have your firewall turned on and your anti-virus and anti-spyware up to date and run regular scans.

We ask that you do not:

1. Stream any video except for occasional short clips (e.g. Youtube)
2. Try to access any other computer or device on the La Roche Chabrelle network.
3. Most importantly carry out any illegal task like downloading music or videos (there are huge fines and prison sentences for doing this in France).

Please do:

1. Browse the Web to safe websites
2. Keep your anti-virus and anti-spyware up to date
3. Deal with your emails (our SMTP server is smtp.orange.fr)
4. Use MSN Live Messenger, Facebook (or equivalent).

The Owners cannot accept any responsibility for any damage to your computer, data or software as a result of using it on the La Roche Chabrelle Network. If you are liable for any fines or prosecution by illegal actions you will be solely responsible and may be liable to third party damages by the Owners.
